//note="Organ: eye; Vector: pT7T3-Pac (Pharmacia) with a modified polylinker; Site 1: EcoR I; Site 2: Not I;
UI-E-BOI is a normalized cDNA library containing the following tissue(s): fetal eye. The library was constructed according to Bonaldo, Lemnon and Soares, Genome Research, 6:791-806, 1996. First strand cDNA, synthesis was primed with an oligo-dT primer containing a Not I site. Double stranded cDNA was ligated to an EcoR I adaptor, digested with Not I, and cloned directionally into pT7T3-Pac vector. The oligonucleotide used to prime the synthesis of first-strand cDNA contains a library tag sequence that is located between the Not I site and the (dT)18 tail. The sequence tag for this library is CGCGTATACC. This library was created for the program, Gene Discovery in the Visual System, supported by National Eye Institute (NEI)."
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      Conservative
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             Distribution: Researchers may obtain clones from Research

Novel AXOR89 polypeptide and polynucleotide encoding it, useful for identifying agonists and antagonists in the treatment of diseases associated with an AXOR89 imbalance, such as cancers, diabetes or

Claim 2; Page 37pp; English

The invention relates to an isolated AXOR89 polypeptide (G-protein CC coupled receptor) and its polynucleotide. The novel AXOR89 polypeptide CC and polynucleotide encoding the polypeptide, is useful for identifying CC and polynucleotide (Grandpolynucleotide) is useful for identifying CC agonists and antagonists (Grandpolynucleotide) that are potentially useful in treating conditions associated with an AXOR89 imbalance, such as CC bacterial, fungal or protozoan infections, cancers, pain, asthma, cCC parkinson's Disease, diabetes, obesity, anorexia, bulinia, acute heart CC failure, hypotension, hypertension, urinary retention, osteoporosis, CC angina pectoris, myocardial infarction, stroke, ulcers, allergies, benign CC prostatic hypertrophy, migraine, vonitting, psychotic and neurological CC disorders, anxiety, schizophrenia, manic depression, delirium, dementia, CC dyskinesias, such as Huntington's Disease or Gilles dela Tourette's cyndrome. The polynucleotide sequence may also be used for chromosome CC localisation or tissue expression studies. The AXOR89 is used as a CC vaccine or to produce fusion proteins. The present sequence is human axond control of the produce fusion proteins. AXOR89 cDNA.

The present specifically claimed human cDNA sequence (located on CC chromosome 13) encodes a purinergic-related G-protein coupled receptor CC (GPCR) of the invention. GPCRs constitute a major class of proteins CC responsible for signal transduction within a cell. Upon binding of a CC ligand to the extracellular portion of a GPCR, a signal is transduced CC GPCR proteins can be divided into five families, family I contains the CC purinergic GPCRs (e.g. the P2Y receptors). P2Y receptors are CC analogues, some also respond to UTP. The invention comprises a human CC g-protein coupled receptor protein and encoding nucleic acids. The GPCR CC protein and nucleic acids of the invention are useful in the treatment of a disease or condition mediated by a human protease. The GPCR protein in biological fluids; identifying compounds which modulate of the protein in biological fluids; identifying compounds which modulate the activity of the GPCR, or the interaction of the GPCR and a molecule with which it normally interacts; and treating a disorder characterised by an absence of, or inappropriate expression of the GPCR protein. The GPCR mucleic acids of the invention are useful in diagnostic assays to identify changes in the GPCR mucleic acid that lead to pathology; CC controlling GPCR expression, and in gene therapy to treat patients with aberrant GPCR gene expression. The GPCR nucleic acids can also be used in the production of transgenic animals.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              1014
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   Human purinergic-related G-protein coupled receptor
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          AAK98323;

ARRESULT 11
ARRESU
The invention relates to an isolated P2Y-like receptor polypeptide CC (ABBB3818-ABB83819) which is also referred to in the specification as CC (ABBB3818-ABB83819) which is also referred to in the specification as CC (ABBB3818-ABB83819) which modulates P2Y receptor activity is useful to treat a cc subject having a disorder that is responsive to P2Y-like receptor CC modulation. The disorder is a disease of immunity or inflammation. The cc substance may also be used to manufacture a medicine for the treatment or CC prophylaxis of a disorder that is responsive to stimulation or modulation of P2Y-like receptor activity. Disorders which may be treated include CC colon cancers, asthma, COPD, Crohn's disease, irritable bowel syndrome, CC gastroenteritis and colitis, inflammatory bacterial infections, CC autoimmune diseases, dermatitis, yiral diseases, bacterial infections, CC autoimmune diseases, dermatitis, glomerulonephritis allergies, allergic crhinitis, inflammatory bain and general inflammation such as tendonitis, CC polymyositis or prostatitis. The invention provides alternative substances for the treatment of immunological and inflammatory diseases. The present sequence is that the P2Y-like receptor variant encoding gene
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          Ś
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       Ś
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     유
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               밁
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           An isolated P2Y-like receptor polypeptide (HIPHUM 0000037) which can used for the identification of agonists and antagonists which may be used to treat an immune or inflammatory disease -
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    01-SEP-2000; 2000GB-0021524

etc., are used for diagnosis and (gene) therapy of diseases that are (in)directly associated with (I) or its expression products. No diseases are specified but as (I) is expressed only in thyroid tissue, (I) is presumed to be involved in regulation of thyroid function. The present

The invention relates to the human P2Y11i gene (I), including its 5' and 3' untranslated regions, located on chromosome 13 and encoding a G protein-coupled receptor. (I) and related mRNA, cDNA, protein, antibodies

(I) is useful for:

(a) assessing whether a patient is afflicted with prostate cancer;

(b) monitoring the progression of prostate cancer in a patient;

(c) assessing the efficacy of a test compound to inhibit prostate cancer in a patient;

(d) assessing the efficacy of a therapy for inhibiting prostate cancer
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          Novel isolated nucleic acid molecule associated with cancerous state of prostate cells and correlating with presence of prostate cancer, useful

Novel isolated nucleic acid molecule associated with cancerous state of

PTXRRXPXRX

```
CC 26904, 38911 and 39404 protein-associated disorder characterised by
CC aberrant expression or activity of the protein, for monitoring
CC therapeutic effect during clinical trials and other treatment, as bait
CC proteins in a two-hybrid or three-hybrid assay, and in pharmacogenomic
CC analysis. The proteins and nucleic acids encoding them are useful for
CC diagnosis and treatment of disorders selected from disorders of the
CC spleen, lung such as Alzheimer's gyndrome, liver such as viral
CC hepatitis, brain such as Alzheimer's disease, haematopoietic stem cells
CC cliscase, colon such as Crohn's disease, hernic puch as such as get's
CC disease, colon such as Crohn's disease, uterus and endometrium such as
CC disease, colon such as actinic keratosis, disorders of the heart
CC such as myocarditis, disorders such as systemic lupus erythematosus,
CC disorders involving the thymus such as DiGeorge syndrome,
CC disorders involving the thymus such as DiGeorge syndrome,
CC disorders involving such as peripheral B-cell neoplasms,
CC disorders and epididymis such as teratoma. Numerous examples of
CC each type of disorder are given in the specification.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  Query Match

                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         3255
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         3195
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         3135
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   The invention relates to the human P2Y1li gene (I), including its 5' and 3' untranslated regions, located on chromosome 13 and encoding a G protein-coupled receptor. (I) and related mRNA, cDNA, protein, antibodies etc., are used for diagnosis and (gene) therapy of diseases that are (in)directly associated with (I) or its expression products. No diseases are specified but as (I) is expressed only in thyroid tissue, (I) is presumed to be involved in regulation of thyroid function. The present sequence is that of the P2Y1li encoding genomic sequence.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           New human P2Y1li gene, useful for treatment and diagnosis of associated diseases, and related proteins, antibodies and modulators, encodes G protein-coupled receptor -
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   Sequence 5435 BP; 1509 A; 1168 C; 996 G; 1762 T; 0 other;

                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              where differences are found these are annotated as variations together with a note of the overlapping clone name. Note that the variation annotation may not be found in the sequence submission corresponding to the overlapping clone, as we submit sequences with only a small overlap as described above.

This sequence was finished as follows unless otherwise noted: all regions were either double-stranded or sequenced with an alternate chemistry or covered by high quality data (i.e., phred quality >= 30); an attempt was made to resolve all sequencing problems, such as compressions and repeats; all regions were covered by at least one plasmid subclone or more than one M13 subclone; and the assembly was confirmed by restriction digest. The following abbreviations are used to associate primary accession numbers given in the feature table with their source databases: Em:, EMBL; Sw:, SWISSPROT; Tr:, TREMBL; Wp:, WORMPEP; Information on the WORMPEP better.

RR11-721F14 is from the library RPCI-11.3 constructed by the group of Pieter de Jong. For further details see http://www.chori.org/bacpac/home.htm VECTOR: pBACe3.6
IMPORTANT: This sequence is not the entire insert of clone RPI1-721F14 It may be shorter because we sequence overlapping sections only once, except for a short overlap.
The true left end of clone RPI1-199B17 is at 65646 in this sequence. The true right end of clone RPI1-65L19 is at 2000 in this
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          http://www.sanger.ac.uk/Projects/C elegans/wormpep This sequence was generated from part of bacterial clone contigs of human chromosome 13, constructed by the Sanger Centre Chromosome 13 Mapping Group. Further information can be found at http://www.sanger.ac.uk/NGD/Chrophara
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        requests: clonerequest@sanger.ac.uk
On Sep 28, 2001 this sequence version replaced gi:15787734.
During sequence assembly data is compared from overlapping clones.

This sequence is a seven transmembrane helix receptor candidate predicted from the whole human genome sequences using our automated system that contains programs of gene finding (Genebecoder), sequence search, motif-domain assignment and transmembrane helix prediction.
And the sequence is submitted by the collaborative project between [Computational Biology Research Center (CBRC), National Institute of Advanced Industrial Science and Technology (AIST)] and [Genome Science Division, Research Center for Advanced Science and
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        ACACTCTGACCCATGGACTGCAAACTGACAGCTGCCTTAAGCAGAAAGCACGAAGGCTAA
